Professional Summary

Open to remote opportunities.

Frontend-focused Full Stack Developer with 4+ years of experience building scalable web applications, internal platforms, and back-office systems.

Specialized in React, TypeScript, and modern JavaScript ecosystems, with strong backend expertise in PHP, MySQL, and REST API development.

Proven ability to design database structures, optimize performance, refactor legacy systems, and deliver high-quality user experiences aligned with business goals.

Comfortable working in Agile environments, collaborating with cross-functional teams, and translating functional requirements into robust technical solutions.
